

# WELCOME TO KUZA

KUZA is a non-profit improving the lives of students, families and communities in Uganda through higher education and leadership development.

**W**e know our students. We get to know their families and visit their villages in an effort to know the students deeper. We understand our students' gifts and talents and advise them in coursework and careers. Currently, we're developing our mentoring program where students will be matched with alumni or working adults who will mentor them. As they grow, we walk beside them along the way.

---

**Good schools.** Education is critical to breaking the cycle of poverty, and that's why we send our kids to the best schools. To really get ahead and broaden future employment opportunities, students must have access to good teachers, scholastic resources and technology. At the high schools we work extensively with teachers and staff to make sure our students needs are adequately addressed.

**Mentoring.** We know our students. We get to know their families and visit their villages in an effort to know the students deeper. We understand our students' gifts and talents and advise them in coursework and careers. Currently, we're developing our mentoring program where students will be matched with alumni or working adults who will mentor them. As they grow, we walk beside them along the way.

**Leadership retreats.** We inspire and encourage students at our leadership retreats, where we teach about time management, goal setting, organization, study habits, public speaking, etiquette, and so much more. Students take a well-deserved break from the pressures of school and family, and relax and play together. Our students participate in a variety of service projects such as visiting the sick in hospital, building a school, cleaning orphanages and encouraging other young people to stay in school and work hard.

**Love.** At the root of everything we do, Love exists. We believe KUZA students are known by God and loved deeply by him. He created each one with unique gifts, talents, and a purpose for living. Our job, as KUZA, is to walk alongside these young men and women as they discover who they are in God.
