

My Story

In 2010, Daniel saw a child with disability for the first time and it piqued my interest. I liked the works for charity organisations around my home areas that provided support to other related people orphans, widows etc. . . . but no support was given to people with disability year-round through in local villages , but it was simply the image in my brain of a child after support with a beaming smile that inspired me if support.

When my mother was studying a degree in special education at Kyambogo University, i and my mother Florence agreed that we can shoulder the responsibility that has had been passed down in our community for generations —

I decided setting up a charity organisation in 2010 with Florence and a friend in NZ called Dot Muir a retired special needs teacher in New Zealand Government, which allowed me to increase the donations to Rwenzori Special Needs Foundation because Dot Muir donate directly to RSNF to support the ongoing programs..

feel that the organisation is working so hard to help more families has now provided 200+ smiles for children in Fort Portal-Kabarole District, I feel so happy to Children with disability living in happy life — our family has been blessed and we can help. We will never know these kids, but it's comforting to know that RSNF will get them what they need.”

I currently am planning a gathering for the 8th anniversary of the RSNF-Support to children with disabilities in Fort Portal, with their parents coming in from all over the communities to celebrate.

*RSNF hopes that Daniel's will and calling by God continues to provide for my community and children born with various disabilities to be helped in the entire region for years to come. If you would like to join Daniel in his support of help us provide more children with disability around the Fort Portal region with new smiles and second chances at life, *This doesn't constitute legal advice, please help us*
