

# EduVision Progress Report March - August 2013

## Overall Evaluation

Rabina is now in the correct grade that fits her age. After repeating grade 9, she is in the government prescribed age for basic education. Next year she will take the final exam.

After her bad decisions and failure last year, she seems to have learned a good lesson. However, she is an average student and is expected to do better in extra-curricular activities, and social work.

She can be an effective person if she learns to listen to advice from elders, and manage to recognize her own weaknesses.

### Special points of interest:

- ☉ Learning to give to others
- ☉ Event management training
- ☉ Rice planting for orphanage
- ☉ Daily lunch program
- ☉ International cooperation and understanding through volunteering
- ☉ Ananda Marga partnership
- ☉ New recreational swimming pool
- ☉ Other important developments of the past 6 months

### German volunteer Holger's comments

After a couple of weeks I found some time now to look at your homepage.

Seems, like everything is running good in EduVision. That's a great pleasure to me, because.....if you believe it or not.....a piece of my heart is still lost in Hetauda.

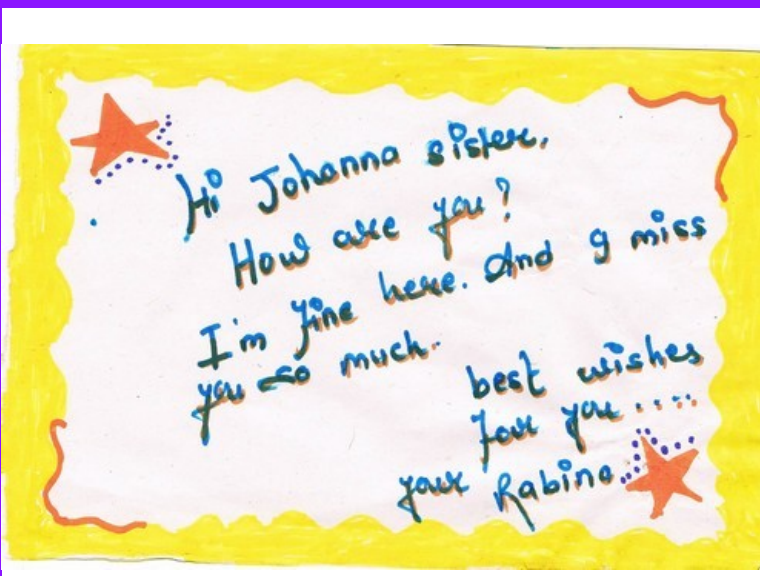

Say warmest greetings to all the kid's, Rama, Nini.....just everyone, I know and who knows me.

And all the best to you, Suren.

Bye, Holger

(June 20, 2013 through email)

### Good wishes card on holiday season

### Student Club meetings and significant decisions

EduVision gives responsibilities to the children to make responsible decision about each other and the activities of the children's club. They regulate and monitor each other's behavior and looks after the group's welfare.

May : Rs. 5000 was given by volunteer Holger's uncle in USA. Holger conducted an election and the children chose the option to give 75% to Homeless Old people.

August: Club decided that merit based system would be used for children invited to events or

October 15: Roshina was found to have seriously violated ethical conduct established in EduVision by hiding office mobile phone, then lying about it. Her mother was consulted in the meeting that voted to suspend her from hostel facility until she realizes her mistake.

October 30: Children tested the rules they had passed and rejected invitation to only few students who did not merit such rewards.

## Developing a habit to give to others less fortunate

### Helping children from three orphanages

EduVision children continued this program to help three children's homes simultaneously. They added a second children's home and deaf school in Gauritar (Saturdays). They also give away fruits and other toys as gifts to these children, which were provided by other organization to us.

## Event Management Training for EduVision children

EduVision children are taught to learn management skills so that they can organize events efficiently in future for our own organization. One of the main programs they have taken over to organize are field trips to various interesting sites around Hetauda for all the international volunteers who come to help EduVision programs.

## Rice planting day for second Children's Home in Hetauda

EduVision children and some international volunteers spent the whole day in the field planting rice for the benefit of the children living there. EduVision kids for the first time experienced what it is like to plant rice in the slushy field and enjoyed it.

## Daily Lunch program for orphans/disabled children

Children of the orphanages where EduVision children volunteered in the morning were found to be going to school without lunch hence either stealing or eating off the floor. So, EduVision started a daily lunch program to help those kids get healthy food. This program has been handed over to another Spanish organization to continue.

## International cooperation and understanding through Volunteering

Dance, music, spiritual programs, singing and learning new English songs as well as participation in morning volunteering programs.

## Forming partnership with Humanist spiritual mission school, Ananda Marga

Love all creatures

EduVision kids not only receive help,  
but in return they learn kindness.

## Special place for recreation for kids

During summer of 2013 for two months, we hosted many Spanish volunteers to test if a beneficial cooperation could be started. Although the program was very positive, because of language barrier, it was not found to be beneficial as much as we liked.

## Activities over the six months

Waste management survey

Special parents meeting

EduVision at new school

Dictation with Americans

Receivign books for our library

Rescuing an orphan kitty

POCEDO, the most poor children, continued to be associated with EduVision and participated in weekly Saturday activities held at Anan-damarg and EduVision.

EduVision kids decided to give 75% of the money given to them by Holger's uncles in USA to old people's home to buy fruit and visit them and perform dances there.
