

Program Success Story – March 2018

True Story from the field: After attending only 3 of our sessions, one 15-year-old participant told us that she had been talking to a 40-year-old male via Facebook Messenger and **recognized several red flags** after learning about warning signs in our class. After speaking to us about this, the participant together with her counselor **reported the person on Facebook and blocked him from her social channels.** We are so very proud of this young lady and feel privileged to have been able to help her recognize the signs that she was likely being groomed by a potential trafficker.
